

## Engine Lubrication System Care

**KUBOTA 15W/40  
Engine Oil.**

### Smooth Operator

*It is imperative that your engine oil and oil filter is regularly replaced.*

*Failure to service your engine will result in engine deterioration, and eventually engine failure.*

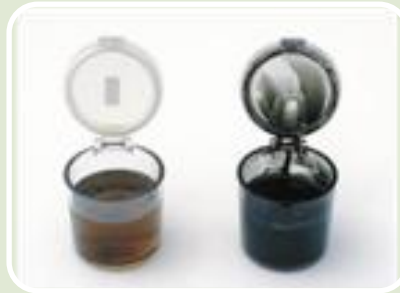

*Use the correct engine oil specified by KUBOTA.*

### Service Tips

*1. Don't forget or try to extend engine oil change intervals, the oils lubricating properties will stop working and metal to metal wear will occur.*

*2. Only use the correct grade of oil specified matched to your climatic conditions, these might be different in hot or cold climates.*

*3. Repair engine oil leaks as dust can be sucked inside your engine through a leaking seal.*

### Engine Oil Care

- Engine oil in your engine is like BLOOD in your body.
- Lubricates engine parts.
- Cools engine parts.
- Cleans the engine.
- Reduces wear.
- Carry the impurities to the filter .

### Engine Oil Filters

- Filter the impurities from the oil.
- Capture and help prevent abrasive material being transferred throughout the entire engine.
- Clogged filters will affect the lubrication system of your engine.

1. Check

- Check oil levels daily.

2. Service

- Service your engine regularly

3. Replace

- Replace engine oil & filter
